AMENDMENTS TO THE CLAIMS

Claims 1-23 (Cancelled)

- 24. (Amended) The method of Claim 23, A method of transfecting antigen presenting cells, the steps comprising selecting a gene delivery complex that transfects antigen presenting cells, comprising wherein the complex eomprises DNA and glucose or a polyethylenimine derivative, and administering the complex by applying the complex without the use of a needle to the skin or mucosa surfaces of an animal, wherein said DNA comprises a nucleic acid sequence encoding at least one immunogenic protein operatively linked to a promoter, and whereby antigen presenting cells of said skin or mucosa are transfected.
- 25. (Previously Presented) The method of Claim 24, wherein the polyethyleneimine derivative targets the mannose receptor found on the surface of antigen presenting cells.
- 26. (Amended) The method of Claim 2524, wherein the derivative is mannosylated polyetheylenimine.
- 27. (Cancelled).
- 28. Please cancel Claim 28
- 29. (Cancelled)

- 30. (Previously Presented) The method of Claim 26, wherein the complex comprises a 5:1 ratio of mannosylated polyethylenimine nitrogen per DNA phosphate.
- 31. (Amended) The method of Claim 2324, wherein the gene delivery complex is added to a glucose solution.
- 32. (Previously Presented) The method of Claim 31, wherein the glucose solution is 5-10% glucose.
- 33. Please cancel Claim 33.
- 34. (Cancelled)
- 35. Please cancel Claim 35
- 36. 39 (Cancelled)
- 40. Please cancel Claims 40-42
- 43. (Amended) The method of Claim <u>2324</u>, wherein the derivative is a sugar-modified polyethylenimine.
- 44. Please cancel Claim 44.
